

Introducing Optergy Studio:

Your single tool to interact, operate and program the Optergy Ecosystem

Why Optergy Studio matters?

Seamless Interoperability: Whether you're using Insights, Edge, Air, or all three, Studio ensures frictionless coordination of configuration, backups, programming and commissioning of your system.

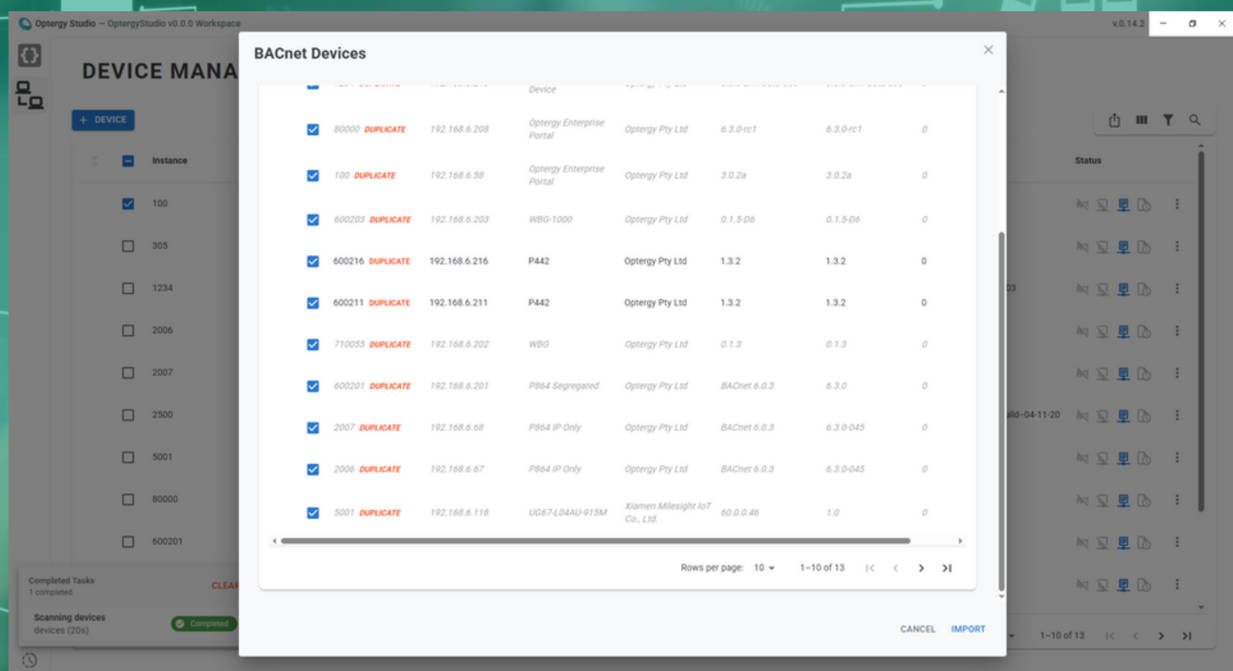

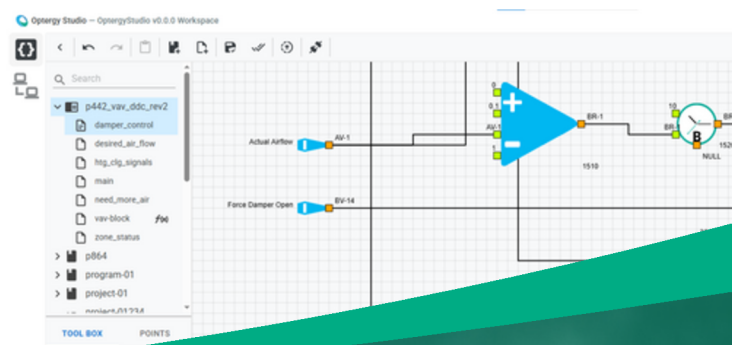

Rapid Mass Actions: Accelerate your rollout with mass programming, configuration, backup, restore and more. Simultaneously manage your entire Optergy ecosystem from one tool with intuitive workflows designed for speed and accuracy.

Cloud Connection: Connect Studio to Optergy's Cloud for automated backup and real-time collaboration across your project workspaces.

Programming Engine: Step into a faster, more powerful programming experience. The new Programming Engine replaces legacy tools with a modern, streamlined interface purpose-built for speed, reliability, and scalability.

Your Controls Workspace reimaged!
